Summary

Sterling OMS Developer building production features for a live enterprise retail platform – Java services, Angular/NextGenCC UI, and REST/JMS integrations. Delivered a reusable NextGenCC component adopted platform-wide, a customer-facing Refund Status API, and a fraud-risk engine integration, alongside a zero-disruption OnPrem-to-OMoC migration.

Education

PSNA College of Engineering and Technology **2020 – 2024**
B.Tech in Information Technology – 81% *Dindigul, India*

Professional Experience

Acuver Consulting **Oct 2026 – Present**
Consultant *Bangalore, India*
Client: Titan Company Limited | Tech Stack: IBM Sterling 9.5/10 (OMS) OnPrem & OMoC, IBM SST, Java, XML, XSLT, Angular, REST APIs, JMS/MQ, SAP/Oracle Integration, Docker, JIRA, GitHub

- **Fraud & Risk Analysis Integration** – Integrated a fraud/risk-engine workflow, backend and UI, giving NextGenCC users visibility and control over high-risk orders before fulfillment.
- **Store Onboarding & Inventory Sync** – Led inventory synchronization enhancements and onboarded Jewel Omni and Helios stores onto the OMS platform.

Acuver Consulting **Jun 2025 – Sep 2026**
Associate Consultant *Bangalore, India*
Client: Titan Company Limited | Tech Stack: IBM Sterling 9.5/10 (OMS) OnPrem & OMoC, IBM SST, Java, XML, XSLT, Angular, REST APIs, JMS/MQ, SAP/Oracle Integration, Docker, JIRA, GitHub

- Reusable NextGenCC Modal Component – Built a generic confirm/API-call modal adopted across multiple NextGenCC features, reducing duplicate component development; packaged the approach into a 4-week enablement program for the wider team.
- Contributed in end-to-end migration of IBM Sterling OMS from OnPrem to OMoC, covering database record migration, in-flight order continuity, and cutover validation while preserving legacy customizations with zero business disruption.
- Delivered 30+ NextGenCC stories spanning Angular UI enhancements, JSON configuration overrides, and table/order-level actions; built OMS capabilities across SDF, sync/async services, custom APIs, User Exits, Agents, and pipelines.
- Designed a custom Refund Status API that gave customers real-time refund tracking, eliminating the need for manual status inquiries.
- Built SAP/Oracle WMS integrations for order, return, shipment, and inventory flows, including advance receipts, return-tax posting, and invoice generation.

Acuver Consulting **Oct 2024 – Jun 2025**
Associate Trainee – Sterling OMS *Bangalore, India*

- Implemented Java business logic and XML/XSLT transformations for OMS APIs; built Angular-based BUC UI components for order management.
- Debugged and validated defects across OMS modules within an Agile delivery cycle.
- Gained hands-on experience in NextGenCC and Order Hub customization.

Technical Skills

IBM Sterling: OMS 9.5/10 (OnPrem & OMoC), DOM/SOM/COM, NextGenCC UI, Sterling Store, IBM SST, Service Definition Framework, DB Query Client
Languages: Core Java (JSE), Advanced Java (JEE), JDBC, TypeScript, JavaScript, XML, XSLT, JSON, HTML/CSS
Frameworks: Spring Framework, Angular
Integration & APIs: REST APIs, Synchronous & Asynchronous Integration, SAP/Oracle Posting, Aekyam Middleware, Data Transformation
Reporting: Jasper Reports (iReport, Jasper Studio)
Databases: Oracle, MySQL, DB2
Messaging: JMS, IBM MQ (Queue-based integrations)
Tools & Technologies: Eclipse, Spring Tool Suite, IntelliJ IDEA, VS Code, Docker, Maven, Postman, SQL Developer, DBeaver, Tomcat
Version Control: Git, GitHub, GitLab
